

Statewide Minor Civil Division Layer Dissolved

Michigan Geographic Framework

Field Definitions

(Shapefile Attribute Table)
(June 1, 2013 – Version 13a)

The following field definitions make up the shapefile attribute table called Statewide Minor Civil Divisions (MCD). This shapefile consists of polygons that represent the boundaries of all Michigan cities and townships. This aggregation of all Michigan city and township polygons provides 100% coverage of Michigan.

The attribute table can be found in the file Mcd_Mlv13a_ds.DBF.

Please Note: If you have any questions about the framework data you have received, please contact Joss Ross at the Center for Shared Solutions. Phone: 517-373-7910, email: rossj@michigan.gov

Field Name	Type	Size	Description	Comments
FIPSCODE	C	5	FIPS Minor Civil Division. Federal Number Identifying a City or Township	This Minor Civil Division (MCD) layer is being distributed Statewide. If a MCD is split by a county boundary, the polygon will not be split. The entire MCD will be represented d by a single polygon.
FIPSNUM	N	5	Federal Number Identifying a Minor Civil Division.	FIPSCODE as a numeric value.
NAME	C	40	Minor Civil Division Name.	Minor Civil Division Name with no qualifiers. For example Lansing Township will be provided as Lansing while the City of Lansing also will be provided as Lansing.
LABEL	C	40	Minor Civil Division Name with Type	Minor Civil Division labels are provided with a polygon type. For example Lansing Township will be provided as Lansing Township while the City of Lansing will be provided as City of Lansing.
TYPE	C	2	Type of Polygon feature	The type will distinguish between City and Township polygons

Statewide Minor Civil Division Layer Dissolved continued

Field Name	Type	Size	Description	Comments
SQKM	N	16,3	Area in Square Kilometers	The values in these three area fields are calculated from the square meter area field in the ArcInfo Polygon Attribute Table (PAT).
SQMILES	N	16,3	Area in Square Miles	
ACRES	N	16,3	Area in Acres	
VER	C	3	Michigan Geographic Framework Version Number	The VER field contains the Michigan Geographic Framework version from which the layer was created.
LAYOUT	C	10	Paper orientation for printing maps	This field is used to determine paper layout when creating cartographic products
PENINSULA	C	5	Peninsula that the polygon is located
